- and more
- record daily activity
- post news in telegram
- manage administrative work

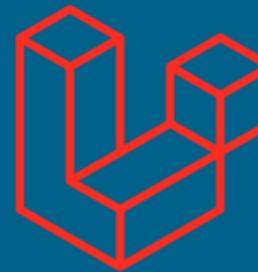

IFour Website

IFour Website is an e-commerce platform where businesses sell electronic accessories and computers. Customers can explore our products directly online, conveniently selecting and purchasing items from their devices.

POS System

A **Point of Sale (POS) system** is designed to streamline sales transactions for products in a mart. It offers features such as product listings with images and prices, a user-friendly interface for efficient order input, and robust order management capabilities. Additionally, integrating Telegram alerts could enhance order notifications for businesses using the POS system.

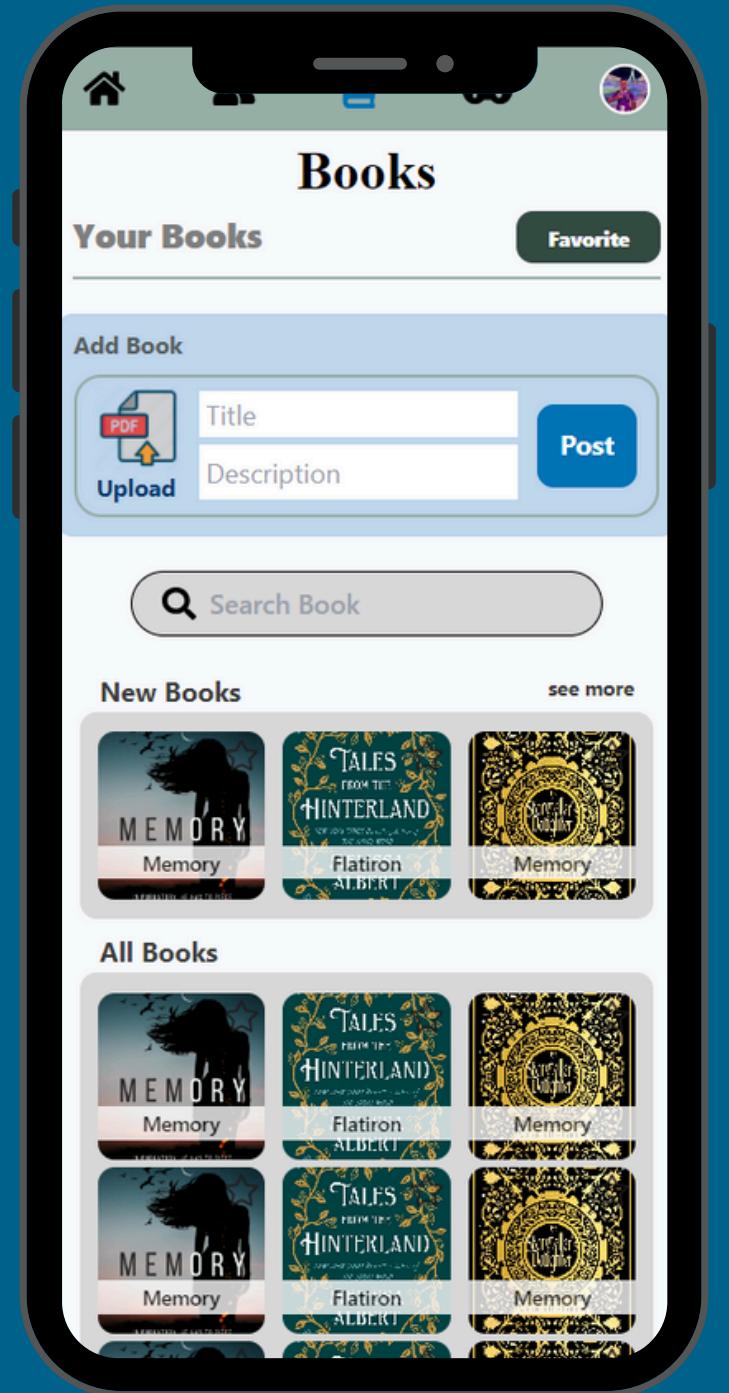

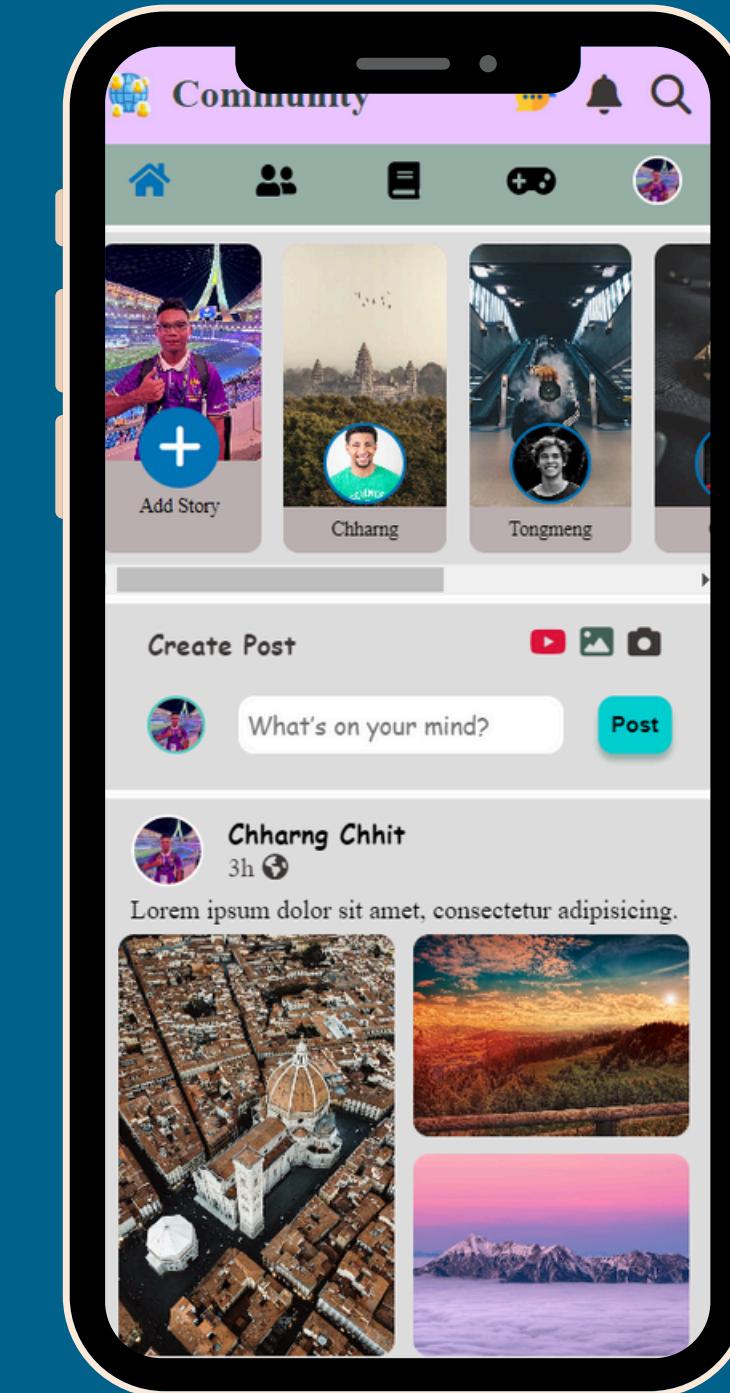

The screenshot shows the CanCyber POS System Admin interface. The top navigation bar includes the logo, language selection (Khmer/English), and user profile. The main menu on the left has categories like 'ផ្លូវកំណត់ផល' (Product Catalog), 'ការបញ្ជាផ្ទៃ' (Sales), 'ការបង់ប្រាក់' (Banking), 'ផលិតផល' (Products), 'អ្នកប្រើប្រាស់' (Suppliers), and 'គណនី'. The current view is under 'ផលិតផល' (Products). It displays a grid of products categorized into 'Snack', 'Food-Meat', 'Beverage', and 'Beauty'. Each product card includes an image, name, price (e.g., 10,000 រៀល), and a delete icon. A summary table at the bottom right shows total items and price: 70,000 រៀល.

The screenshot shows the CanCyber POS System Admin interface displaying a transaction history. The top navigation bar and menu are identical to the previous screen. The main content area shows a table of transactions with columns: 'លេខឈ្មោះ' (ID), 'លេខភព' (Phone Number), 'ឈ្មោះ' (Name), 'ប្រភេទ' (Category), 'តម្លៃ' (Price), 'ពេលវេលា' (Time), and 'ការបញ្ជាផ្ទៃ' (Sale). The table lists 10 transactions from June 12, 2024, at 08:11 PM, including items like Heineken, EGB, Creamsoda, IZE, G, Beef, Chicken meat, Clam, Jerky Beef, and Crab.

Community

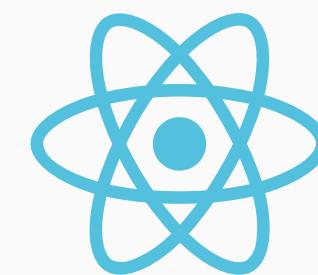

Community is a website that builds a similar platform to Facebook. It offers a range of features including profile customization, social networking, and a dedicated section for books. The platform leverages modern web technologies such as HTML5, CSS3, JavaScript, and Tailwind CSS to create a responsive and interactive user experience. The mobile app showcases a user-friendly interface, allowing members to connect, share, and engage with content seamlessly across devices.
